

Diabetes Epidemic

Diabetes Epidemic ?

Yes.

It is totally unknown on this planet, it was an alibi known to French treasury, Minister of Health of France.

Migrant Smugglers and Refugee Business :

That is the channel created and aided by France to make men, money and material available (away from public scrutiny) for acts of terrorism in India.

France gave this select group of persons (in thousands) almost everything they wanted, but the same was denied to a legitimate, deserving Indian.

(Thousands of Beneficiaries and French doctors were originally from countries which lie along the arc from where India was targeted and killing of innocent, infidel Hindus was planned).

Selective vision and convoluted-warped (though pliable) politically profitable definition of victims, Humanitarian and Human Rights.

Usually human beings, who have been themselves victims of torture and persecution do not engage in activities leading to torment, torturing innocent others.

But experiences with French authorities and its favoured agents defy all the logic known to the world.

What Rights ? Whom to favor ? Whose definition of Rights ?

Truth became known as the need arose.

In 1990's French Government chose to let a select group of foreigners in under the cover of Humanitarian Aid.

Obviously French Government rationalised those grants, as the applicants attached Medical Expertise certificates from their patron/favourite doctors*. The same select group-a favourite of French Government were later through Fast Track or Privileged track granted French Residence Permit

And when the same select group trampled upon the basic/fundamental rights of another group in France. France shut the door

in the face of victims.

Made in France or France Recycling Jihadis ?

(Thousands of Beneficiaries and French doctors were originally from countries which lie along the arc from where India was targeted and killing of innocent, infidel Hindus was planned).

* the soliciting doctors met their clients at meetings of ritual-wise and socially-like minded persons.

Only when the establishment's secret became a public news, did the French Administration around year 2000 take token measures. Since then the abovementioned doctors' certificates must be approved by DDASS.

Truth became known as the need arose.

Diabetes Epidemic ?

Although once favoured, around year 2000 and onwards Medical Expertise Certificates from

Doctor A M..... .

Doctor B……..

Doctor H….. .

These (plus others...).....

were declared inadmissible by French Administration.

France's favoured medical doctors issued medical certificates as witnesses, and Expertise which were naturally and very easily accepted by the Préfecture in France.

The French Administration did not question even a single attestation from these (and such...) so called doctors.

French proxy ?

Insider Trading ?

Corruption?

Because beneficiaries through these channels acquired all kinds of benefits from the French Government, including Maladie certification (Immigration Sanitaire) for Immigrant status.

Usually human beings, who have been themselves victims of torture and persecution do not engage in activities leading to torment, torturing innocent others.

Didn't French Administration allow (through acts of commission or acts of omission) such Double Faced, Double Standards under the cover of UN and European Convention of Human Rights, because when caught France would always have an alibi ?

France being one nation and member state of EU/COE, France allowed the existence, proliferation, imposition and enforcement of Human Rights Charter the mandate of which is defined neither by the UN or ECHR ?

If that was not enough, France awarded and rewarded individuals as well as collectives-NGO s to enforce such hidden

agenda.

Truth became known as the need arose.

Islamic Charter of Human Rights is not the same as UN Charter of Human Rights.

In the outsourced war/Torture through privatized warriors.

Torture machine/Slaughterhouse-Late 1980's through 2005.

Late 1980's through 1990's: Racism based denial of services/opportunities was quite common and at that time a

Complaint of Racism in France had No Chance.

And the truth behind this statement, power of such racist attitudes/sentiment in the psyche of the masses/public would be obvious from the experiences (similar) over the years ending in 2005.
